

## Predictions

- ▶ Universities won't survive. The future is outside the traditional classroom....Thirty years from now big universities campuses will be relics (Peter Drucker, Management Guru)
- ▶ By 2020, eLearning will be main stream and classroom teaching will be supporting part (international conference on eLearning for knowledge-based society, 2008)
- ▶ The future of universities may depend on blending the strengths of online education and those of face-to-face education—for the benefit of both students and the nation.
